WORK EXPERIENCE

GraceKennedy Financial Group

Kingston, Jamaica

Software Engineer

Apr 2023 - Present

- Enhance the GK ONE App, a financial platform that modernized Jamaica's digital economy by enabling remittances, bill payments, and prepaid card management, making financial services more accessible.
- Developed the direct-to-bank registration flow, implemented direct-to-bank transfers for inbound remittances, and integrated mobile wallets within the GK ONE App, expanding digital payment options.
- Continuously enhance the remittance and onboarding flows through bug fixes, performance optimizations, and feature updates to streamline transactions and improve user experience.
- Collaborate within a cross-functional Scrum team of eighteen (18), consisting of software engineers, UI/UX designers, data scientists, marketing professionals, and business stakeholders, to deliver effective solutions for the GK ONE App.
